

JITTA

JOURNAL OF INFORMATION TECHNOLOGY THEORY AND APPLICATION

CALL FOR PAPERS: SPECIAL ISSUE ON THE ROLE OF DIALOGUE IN INFORMATION SYSTEM DEVELOPMENT

There is increasing discussion in the IS literature about the importance of experience, oral communications, language, dialogue, debate and consensus to overcome many of the IT problems facing organisations and communities. To encourage discussion, this special issue of **JITTA** invites papers, especially those using interpretive methods, to explore such topics as:

- Negotiation (debate, argumentation, dialogue, consensus).
- The people-network model of Knowledge Management.
- Oral/aural technologies and electronic meetings.
- Group Judgemental Forecasting (especially scenarios).
- Group Problem Solving.
- Policy Setting.

JITTA is double blind refereed, Internet based, scholarly Journal. Our intended readership is community leaders, managers, researchers and students who are interested in learning from the application of IT to real business situations.

Target publication date for the special issue: [Nov 2001]

Submission deadline: [August 2001]

Submit papers directly to the special issue associate publisher (see below).

For more information about **JITTA** and about submitting papers to **JITTA** see the "instructions to authors" at: <http://jitta.org>. For more information on this special issue contact the special issue associate publisher directly.
